

WINTER 2022-2023 INVESTING IN THE FUTURE

We have continued to invest in our business for future activities. Towards the end of 2021 we purchased the entire hire inventory of West Sussex based Stage Services. It has been a tight squeeze to get it all into our premises, but we managed it!

Included in the newly obtained kit are more lighting fixtures, control desks, stands, many cables and staging. The staging has been out on hire quite regularly and gives us the ability to quickly respond to customers total project requirements.

After a long wait of over a year we have finally taken delivery of our replacement van. It was worth the wait as the new model of the Mercedes Sprinter is fantastic and is a vast improvement over the old VW van that served us so well for over 18 years. We now have two Mercedes Sprinters finished in our new vehicle wrap design.

STAGING HIRE

Since taking on board staging we have been getting a steady number of requests for our extended services. We can either just supply the staging for client collection, deliver it or deliver and set it up.

The staging that we have is UK manufactured Mainstage Cameo system. Its available in 2m x 1m and 1m x 1m. Of lightweight aluminium construction, the loading capacity is 5kN per square metre. We have a variety of height options, steps, handrails and valances. Moving the sections around is easy as each 2m x 1m weighs just 33kg. Setting up is easy using the Cameo innovative "Leg Lock" system

A recent hire of staging was for a show at Christ Hospital School near Horsham where multi levels were required.

DURRINGTON HIGH SCHOOL

We are delighted to announce that we have been awarded the Audio-Visual contract for the new Performing Arts Centre that is going to be built in Worthing during 2023. We shall be installing stage lighting, large venue video projector and screen, surround sound system, curtains and drapes.

SUPPLIES OF CONSUMABLES

With the increased use and change over to LED lighting you may be experiencing problems getting hold of spares for generic lighting.

A reminder that we always carry good stocks of replacement lamps and lighting gel. We also carry extensive stock of good quality, alkaline batteries, LX (insulation tape) and Gaffer tape in a variety of colours.

You can order most of these items on our Online Store or telephone us and speak to a human.

OUR WEBSITE

Visit www.tsprofessional.co.uk and you will find links to our HIRE equipment with prices excluding VAT. Our ON LINE STORE can be reached using the STORE link where we have a range of equipment and consumables priced including VAT. You can also read previous issues of our newsletter

BANCROFT'S SCHOOL

Based in Woodford Green on the edge of Epping Forest we sent a team in to service sound and lighting equipment used in their Great Hall and in the Performing Arts Centre. We spent one week tidying up cabling and set up digital sound and lighting desks in both venues

New DSP amplifiers for the Great Hall sound system now located in the green room.

Three new Dynacord DSP C2800FD two channel power amplifiers were fitted into a new double hinge 19" equipment rack in the Great Hall to bring the sound system up to specification. All wiring was repaired and tidied up as required.

Additional work was carried out to tidy up the existing analogue dimmer packs and wiring for the stage lighting.

Stage left new equipment rack for AV and local audio control in the Great Hall

In the Performing Arts Centre amplifiers from the Great Hall were re-purposed for the sound system. Lighting was completely serviced, and all fixtures PAT tested. DMX circuits were rejigged, and lighting scenes programmed for simple operation.

A full inventory of all equipment in both venues was carried out to enable the school to plan for future updates and requirements.

ON LINE STORE SUCCESS!

Although a small player in the world of On-Line Stores we are pleased to see that in the last six months our On Line orders have increased considerably. This will be due to a world shortage of Professional AV products and the fact that some of our items are at pre-increase prices from our suppliers. A worldwide shortage of electronic components has reduced the supply of kit so with our forward ordering we have managed to obtain moderate stocks for our customers. Our most popular selling products have been the Allen & Heath SQ6 and QU16 digital audio mixers.

Check out our store here <https://tsprofessional.co.uk/online-store-2/>

Among the products we offer we try to keep stock of ZOOM and RODE products.

ZOOM F3 Two channel field audio recorder £295.00

We are still supplying blank magnetic tape in open reel and cassette formats. We even have old stocks of video cassettes that every now and then a small band of customers still seem to require!

In our next newsletter we shall be making an exciting announcement about a new range of open reel blank tapes available from stock.

CABLES MADE TO ORDER & GUARANTEED FOR LIFE!

Our own brand ProCONN cables are now available from stock and shown on our online store. Each cable supplied is **guaranteed for life**. Wherever possible these leads will be manufactured using Neutrik connectors and the best quality flexible cable. Each cable is supplied with a clear piece of heat shrink ready for customers to attach their own identification label or if made to order we can fit a printed heat shrink label with your name on it. Cables may be made to your order for same day or next day delivery.

Windlesham School, Brighton – attention to detail

4.5 metre wide screen fixed to the wall on four special TSPProfessional brackets

New AV and stage lighting was required in a recently built multi-use Hall. A new projector and screen were fitted. The screen had to be mounted in between the wall mounted acoustic panels. We made special cranked brackets to go into the spaces between the panels to mount the screen exactly where required.

For the projector we made a special bracket that supported the new lighting bar and the new projector. Because ball games take place in the Hall we made and fitted a custom security cage for the projector

Video projector and new lighting bar fixed using a special wall bracket with security cage

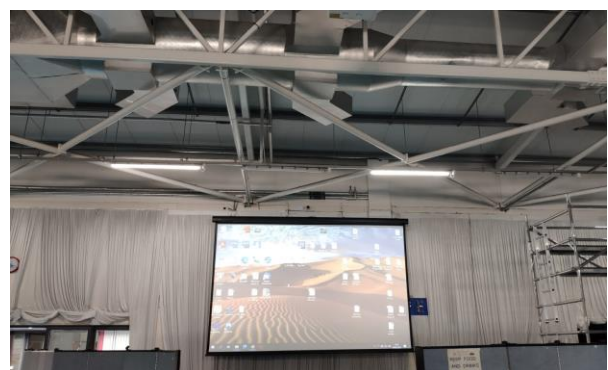

Hindu Temple and Apple Tree Centre in Crawley

New video screens and projectors have been fitted in two venues at the Apple Tree Centre. One area is a large Hall used for multiple activities and as well as a break out area for the main Temple. In this area we fitted a 4.5 metre electric projection screen and high output laser projector. A sound system based on FBT loudspeakers has also been added for general and use with the projector.

In the Temple a fixed frame projection screen was specified, again 4.5 metre wide but placed above lower Temple ornaments etc. This presented issues with access so we put in a small scissor lift to lift the screen over these obstacles. Another high output laser projector was also fitted into the ceiling.

A challenging installation not only for access but also because the venue was in constant use requiring timed working periods without disrupting the Temple's activities

In the large Hall the video projector was fitted to the roof structure using a specially manufactured TSPProfessional bracket.

Video was distributed to both projectors using HDMI on an HDBaseT network.

A six FBT loudspeaker system driven by FBT amplifiers and managed by an FBT DSP was installed into the Hall.

A small compact Denon professional audio mixer handles all inputs for projector sound and additional microphones.

Offices and warehouse

On site we have manufacturing and repair facilities plus sales office and trade counter for purchases of essential consumable and accessories. We carry good stocks of wired and wireless microphones as well as blank media, leads and batteries. Visitors are always welcomed to view our facilities in Burgess Hill. As we are always busy it is advisable to telephone ahead of your planned visit,

Trampoline and DMT League

We were delighted to again support the League Series 1 – Southeast at the Triangle Centre in Burgess Hill after a break of two years due to COVID lockdown.

We supplied a six cabinet HK audio Projector system for the PA system used for announcements and background music, all delivered and set up in good time for the well attended weekend event.

Wimbledon International Music Festival

For the second year running we have supplied lighting for various events during this annual festival which runs through most of November.

Photo shows the lighting provided for a concert held in the Sacred Heart Church in Edge Hill using some small new spot LED RGBW lighting fixtures.

Lighting was also set up in Trinity church with wireless control from a Zero 88 FLX digital control desk.

Hire a laser

Apart from the recently added small spot RGBW lighting fixtures we have also added a new Laserworld DMX professional laser.

The DS-2000RGB Mk3 is graphics capable and has a maximum scan angle of 50° at 2000 mWatt and is available to hire now.

St. Lawrence Fair is back!

After a break of two years due to COVID the 700+ year old St. Lawrence Fair was back on Hurstpierpoint Village Green during a sunny day in July. We set up an Electrovoice line array system, audio mixer and a variety of radio microphones used for an extremely busy day.

The day before we supplied a large sound system with a comprehensive microphone package for the band evening. We also added this year a full set of staging for the band to perform on.
